ABOUT KAYLA / KVDK

Kayla Victoria de Klerk is an accomplished South African Graphic Designer. Kayla made the move from her home country with her now husband to the United Kingdom to grow her career.

She attained her Bachelor of Design degree from a private design institution with campuses in both South Africa and Dubai - Inscape Education Group.

Her career has flourished since then. Beginning at a small media agency in Cape Town, she has progressed to working with leading innovators in the skin health industry. Kayla is proud to have been part of Dermalogica, a globally recognised skincare authority, and has spent over a year growing with The Organic Pharmacy (TOP), a company focused on organic and natural skin and healthcare products.

Kayla has had her work featured in multiple spa magazines globally, had art printed on taxis, and recently assisted in the full rebranding of TOP. She has also freelanced for companies like KnetMiner - redesigning the Gene Discovery Platform's website from scratch.
